Course Description

Dear Colleagues,

We are thrilled to announce the **SCCM Critical Care Ultrasound: Basic Adult Course, and Pediatric and Neonatal Point-of-Care Ultrasound (POCUS)** Course taking place on September 19, 2024, **Advanced Critical Care Ultrasound: Echocardiography Learning Lab** on September 20, 2024 at the Sofitel Hotel in Abu Dhabi, UAE. The course has been thoughtfully planned to provide an engaging and informative event where attendees can share knowledge, enhance their skills in performing and interpreting adult ultrasound imaging, and shape the future of critical care medicine.

With rapid and precise detection capabilities, ultrasound examinations have become an essential part of clinical assessment in the critical care setting. This course offers attendees the opportunity to learn or enhance their point-of-care ultrasound skills, allowing for immediate patient management.

Our program highlights the latest evidence-based developments in critical care ultrasound. With a low faculty-to-attendee ratio, attendees can expect significant hands-on experience with a focus on new innovations, procedures, and diagnostic challenges.

Throughout the course, expert faculty will lead interactive sessions, using live models to provide realistic training in ultrasound imaging. Attendees can also expect to engage in valuable networking opportunities and gain inspired perspectives from experts in the field.

We believe that patient safety and staff training are crucial drivers for the future of critical care medicine. We hope that attending this unique learning opportunity will expand your knowledge and motivate you to improve and enhance the care you deliver to your patients.

Don't miss out on this exceptional opportunity to advance your skills and broaden your perspective in critical care ultrasound.
